

Figure 1

Figure 1 consists of two panels, (a) and (b), showing histograms of the number of non-zero elements in the vectors \mathbf{v}_k . Panel (a) shows the distribution for $k=1$, and panel (b) shows the distribution for $k=2$. Both panels have a y-axis labeled "Number of Vectors" ranging from 0 to 100 and an x-axis labeled "Number of Non-Zero Elements" ranging from 0 to 100. The distributions are highly skewed towards zero, indicating that most vectors have a small number of non-zero elements.
